Krawczyk had built a predecessor program that was known as D-A-X, but it didn't seem to be able to handle every project. The company was sold in 1986 to a firm called APAD Systems, and the name was changed to AutoCAD. The original format of AutoCAD was the micro-computer platform MS-DOS, with a command line interface. Reports in Spain claim Spurs have already contacted Caixinha to discuss the position and are willing to offer him a five-year contract. Spurs are understood to have been impressed by Caixinha's presentation in his first interview since leaving Valencia in May. The Portuguese had spent seven years at the Mestalla, winning three trophies and guiding Valencia to a record-breaking treble in 2014/15. But after his team, managed by Marcelino, finished fifth and 17 points off of champions Barcelona, he left the club in May - with some players publicly criticising the coach. He has since been linked with a number of coaching positions and Sky Sports News understands he remains a top target for the new Spurs boss. Sky Sports News understands a release clause in his contract in the region of £20 million is also a significant factor in Spurs' decision to approach him. When asked about Caixinha after Tottenham's 2-0 win over Valencia in the final game of the season, Mauricio Pochettino said: "The best thing is the team. "I think all our coaching staff are doing their best to make the team in the best way. "I think at the moment we are doing very well. You can see that on the pitch." Pochettino's appointment as Spurs manager is all but confirmed with seven months to go until the end of the season. With the club entering the final 12 games of the season, Pochettino has an opportunity to build the squad to push on next season. Sky Sports News understands that there are only a couple of positions left in the squad - with the final position currently being filled by Ben Davies.This is the continuing story of me, my
